High-trajectory launchings from the Gaza Strip

Throughout January 2010, 13 rockets and 28 mortar shells were launched** towards Israel (in 26 attacks) as opposed to 9 rockets and 3 mortar shell launchings in December (in 11 attacks).

****Clarification:** The number of launchings is the number of rockets/mortar shells actually launched during one high-trajectory fire attack. For example: one attack may include a salvo of three launchings, that is, three rockets/mortar shells, and so it will be counted as one attack and three launchings.
