High-trajectory launchings from the Gaza Strip

Throughout September 2011, 8 rockets and 2 mortar shell were launched** towards Israel (in 9 attacks), compared to 145 rockets and 46 mortar shells in August 2011 (in 134 attacks).

****Clarification:** The number of launchings is the number of rockets/mortar shells actually launched during one high-trajectory fire attack. For example: one attack may include a salvo of three launchings, that is, three rockets/mortar shells, and so it will be counted as one attack and three launchings.
